## SUBJECT INDEX

Absorptive cells rat intestine 654
Acetylation blockade of metachromasia and basophilia 691
Acid fast reaction of bacteria, chemistry 611
Acid fuchsin–methyl blue for mitochondria 102
Acid mucin stains with fluorescent Aspergillus polysaccharide 8
  with fluorescent deacetyl chitin 14
Acid polysaccharides
  basic fuchsin stain 766
  in human arteries 441, 448
Acid mucopolysaccharide reactions, pH effect on 684
Acid phosphatase
  Azo dye methods 741
  electronmicrography, jejunum 228
Acid phosphatase in hepatoma 669
Acid phosphatase in insect metamorphosis 666
Acid phosphatases in kidney 671
  pinocytosis 231
Acid phosphatases with hexazonium pararosaniline 670, 741

Acid phosphatases, specific 670
Acridine orange for acid mucopolysaccharides 683
Acrolein effect on plasmalogen 375
Adenosine-5′-phosphatase
  anion effect on 520
  in rat brain 421
Adenosine triphosphatase
  histochemistry 731
  mitochondrial 65, 285
Adenosine triphosphatase in nuclei 636
Adenosine triphosphatase
  in skeletal muscle 661
  ultra structure in viscera 661
Adrenaline, ambient temperature effect 2
Adrenaline nonreactive to iodate 228
Alcian blue stain for electronmicroscopy 688
Aldehyde fixation, enzyme activity 652
Aldehyde fuchsin stain after oxidations 528
Alkaline phosphatase
  anion effect on 520
  in experimental brain swelling 688
  phospholipid synthesis in gut 596
  rat brain 515
Alkaline phosphatases, pancreas and liver 660
Aminonucleoside nephrosis, enzyme quantitation 259
*p*-Aminodiphenylamine mediation in cytochrome oxidase 75
Aminopeptidase, bromindolyl leucinamide substrate 673
Amyloid, mechanism of Congo red stain 355
Amylophosphorylase in blood cells 572
Anion effect on phosphatase activity 320
Announcements 1, 121, 122, 238, 373, 514, 647
Aortic and arterial acid mucopolysaccharides 441, 448
Arylamine aldehyde condensation in tissue 303
Aryl-formaldehyde fluorescence 348
Arylsulfatases A, B, and C 106
Ascites tumor cells, cytochrome and peroxidase 656
Aspergillus polysaccharide fluorescein stain 8
Assay, microscopic microbiological 662
Autoradiography of histidine $H^3$ in bone 601
  (see also radioautography)
Bacterial acid fast reaction, chemistry 611
Basic mucopolysaccharide
  effect on acid mucin stains 19
  precipitins for 24
Basic protein in nuclei, alkaline Biebrich scarlet 691
Basophilia, effect of acetylation 691
Bathophenanthroline method for iron histochemistry 490
Blood cells amylophophorylase 572
Books received 113, 236, 509, 638, 771
*Book Reviews:*
  Bourne and Danielli: *International Review of Cytology* 112
  Salton: *Microbial Cell Walls* 112
  Gunsalus & Stanier: *The Bacteria* 234
  Van Slyke & Plazin: *Micromanometric Analyses* 234
  Ham and Leeson: *Histology*, 4th Edition 234
  Montagna: *The Structure and Function of Skin*, 2nd ed. 509
  Aronson & Volk: *Cerebral Sphingolipidoses* 638
  Olgilvie: *Histopathology* 771
  Causey: *Electron Microscopy* 771
Brain esterases, electrophoresis 676
Brain hydrolases in rat 515
Brain lipids, formaldehyde action on 79, 704
Brain 5′-nucleotidase in developing rat 421
Brain swelling and alkaline phosphatase 688
Bromoindolyl leucinamide for aminopeptidase 673
Bromine silver for olefines 83
Calcium oxalate, histochemical demonstration 505
Carboxylation of tissue 469
Catecholamine-formaldehyde fluorochromes 348
Cerebellar oxidative enzymes in rat 619
Cervicovaginal epithelial periodate Schiff in ontogenesis 29
Chediak-Higashi Syndrome, renal inclusions in 662
Chitin, arthropod, histochemistry 109
Chitin, molluscan, histochemistry 504
Cholinesterase localization, spreading factor 435
Chondriome, short method 102
Chromosomal histone synthesis 137
Chromosomes, X, 2 forms, thymidine $H^3$ label 665
Chromatography of ultracentrifuge supernatants 678
Chymotrypsin hydrolysis of L-leucyl-β-naphthylamide 766
Comparison microscope, binocular 637
Component quantitation of tissue 324, 329
Congo red, mechanism of amyloid stain 355
Connective tissue histochemistry in human skin 710
Coronary artery acid mucopolysaccharides 441, 448
Culture cells, dehydrogenases 104
Cyclic enzyme changes of ganglion cells 42
Cysteine desulfurase in skin 400
Cytochrome, erythrocytes, acites tumor cells 656
Cytochrome oxidase, *p*-aminodiphenylamine 75
Cytoplasmic inclusions, renal 662
Cytosiderin and other cytoplasmic particles 528
Deacetylchitin fluorescein-acid mucin stain 14
Decalcification and dehydrogenases 232
Decalcification effects on bone protein loss 566

Decalcification, fixation and glycogen 245
Decalcification in acid and glycogen preservation 763
Dehydrogenases
activity in neurons 213
after versene decalcification 232
quantitation, aminonucleoside nephrosis 259
in tissue culture 104
scorbutic seminal vesicle 387
Demineralized bone, cation uptake *in vitro* 664
Deoxyribonuclease digestion technic 204
Desiccation effect in immunofluorescent nuclear staining 686
Desiccation effect on cytology and cytochemistry 495
2,4-Dinitro-1-fluorobenzene reaction with tissue proteins 537
Diphenamine Schiff's bases in tissue 303
4,7-Diphenyl-1-10-phenanthroline histochemical reagent for iron 490
Diphosphopyridine nucleotide dehydrogenases 657
Diphosphopyridine nucleotide diaphorase, exfoliative cytology 667
Disaccharidase in tissues 294
Disulfide in Paneth granules 106
Ductus arteriosus of dog, histochemistry 667
Elastica, protease and lipid solvent actions 222
Electronmicrography
adenosine triphosphatase 285
jejunal acid phosphatase 228
Electronmicroscopy, alcian blue stains 688
Electrophoresis of lactic dehydrogenases 365
Electrophoresis of rat testis esterases 186
Enzyme assays after section freeze substitution 592
Enzymes, polyvinyl alcohol imbedding 341
Enzymic oxidation of polycyclic hydrocarbons 412
Enzymorphology of estrogens 689
Epidermal mitochondrial enzymes 655
Erythrocytes, cytochrome and peroxidase 656
Esterases homospecific with trypsin 672
Esterases, man, starch gel electrophoresis 676
Esterases in rabbit ganglia 677
Esterases in rat brain 515
Esterases in rat testis, electrophoresis 186
Estrogen enzymorphology 689
Ethylenes, bromine silver reaction for 83
Exfoliative cytology in man, DPNH diaphorase 667
Feulgen fading in sperm 39
Feulgen and naphthol yellow S simultaneous cytophotometry 564
Feulgen stain bleaching in light 547
Fluorescent protein, extravascular distribution 194
Formaldehyde action on brain lipids 79
Formaldehyde action on human brain lipids 704
Formaldehyde effect on plasmalogen 375
Formaldehyde fluorescence of catecholamines 348
Fuchsin stain for acid mucopolysaccharide 766
Gallocyanine chromalum, quantitation of nucleic acids 367, 680
Ganglion esterases in rabbit 677
Gangliosides in glycolipoprotein granules 686
Genotypes studied by zymogram technic 103
Glucose-$C^{14}$ incorporation into liver glycogen *in vitro* 556
Glucose-6-phosphate dehydrogenase quantitation 658
Glucose-6-phosphatase ultrastructure liver 754
$\beta$-Glucuronidase
improved localization by gum sucrose 101
in hepatoma 669
in rat brain 515
mechanism of ferric hydoxyquinoline method 719
metal salt immobilization 660
Glutamic dehydrogenase quantitation 658
$\alpha$-L-Glutamyl-$\beta$-naphthylamidase 675
$\alpha$-Glutamyltranspeptidase histochemistry 257, 481
Glycogen
accumulation in nucleus 175
fixatives and versene decalcification 245
histochemical identification 110
tissue decalcified with acid 763
synthesis in blood cells 572
*in vitro* synthesis from glucose-$C^{14}$ 556
Glycolipoprotein granules as lysosomes 684
Golgi location of nucleoside diphosphatase 368
Golgi, thiamine pyrophosphatase 651
Gram stain in mammalian tissue, significance 36
Gum-sucrose in $\beta$-glucuronidase method 107
Hematoxylin, mechanism of phosphotungstic acid 664
Hematoxylin without metals as nuclear stain 502
Hepatic phagosomes with horseradish peroxidase 672
Hepatoma, $\beta$-glucuronidase and acid phosphatase 669
Heterogeneity of oxidative enzymes 657
Hexazonium pararosaniline in acid phosphatase method 670, 741
Histidine-$H^3$ localization in bone 601
Histochemical Society
History 129
Lists of Members 129, 374
Histochemical Titles from current literature 114, 239, 370, 510, 639, 773
Histone synthesis in chromosomes 137
*p*-Hydrazinobenzoic acid, tissue carboxylating agent 469
8-Hydroxyquinoline $\beta$-glucuronidase method, mechanism 719
Immunofluorescent nuclear staining, desiccation effect 686

Immunofluorescence technics, paraffin imbedding 250
Insect metamorphosis, acid phosphatase 666
Interferometry and naphthol yellow S photometry 679, 680
Intestinal absorptive cell chemistry 654
Intestinal alkaline phosphatase, phospholipid synthesis 596
Iodate reactions of adrenal medulla 228
Iron demonstration by bathophenanthroline 490
Kinetics of mast cell amidase and esterase 674
Kössa reaction, influence of light 102
Labelled serum incorporation in ovary 666
Lactic dehydrogenases electrophoresis 365
Lecithin, $OsO_4$ reaction with 89
Leucine amino peptidase 257
  localization discrepancies 315
Leucocytes, mouse, succinic dehydrogenase 402
Light effect on Kössa reaction 102
Lipids, brain, formaldehyde action on 79, 704
Lipids, polyvinyl alcohol imbedding 341
Lipid solvent action on elastica 222
Lysosomes, glycolipoprotein granules 684
Lysosomes, origin by electronmicroscopy 687
Lysosomes, ultra structure 654
Mass determination of mitochondria 677
Mast cells, alcian blue safranin stain 503
Mast cell protease, esterase kinetics 674
Mast cells, trypsin-like enzyme 109, 257
Members of Histochemical Society 129, 374
Metachromasia, effect of acetylation 691
Microscopic microbial assay method 662
Microspectrophotometry of section protein 679
Mitochondria, mass determinations 677
  activity in neurons 213
  adenosine triphosphatase 65
  oxidative enzymes 650
Mitochondrial enzymes, epidermis 655
  formazan production, osmotic protection 939
  staining method 102
  succinic dehydrogenase in cultures 504
Molluscan chitin, histochemistry 504
Mucopolysaccharides, acridine orange stain 683
Mucopolysaccharides by metal ion complexes 683
Muscle adenosine triphosphatases 661
Muscle plasmalogens, histochemistry 462
Myelin and phospholipids, new dyes 665
Myotonic dystrophy, chemocytology 229
Napthol yellow S. photometry and interferometry 679, 680
Naphthol yellow S. protein and Feulgen quantitations 564
Neuronal mitochondrial activity 213
Ninhydrin Schiff reaction, significance 365, 769
N losses in acid and versene decalcifications 560
Noradrenaline ambient temperature effect 2
Noradrenaline $H^3$ in brain 392
Nucleases in epithelia 651
Nucleic acid quantitation, gallocyanine chromalum 680
Nucleocytoplasmic relations in neurons 767
Nucleus
  adenosine triphosphatase 636
  glycogen accumulation in 175
  histone synthesis 137
  nucleic acid metabolism 145
  staining with mordant-free hematoxylin 502
Nucleolus
  nucleoprotein staining 227
  succinic dehydrogenase 6
  synthetic activity in 162
Nucleoprotein oxyphilia at alkaline pH 691
  staining in nucleolus 227
Nucleoside diphosphatase in Golgi zone 368
5-Nucleotidase in developing rat brain 421
Osmic acid reaction with lecithins 89
Ovarian incorporation of labelled serum 666
Oxidases in cultured cells 104
  in rat cerebellum 619
Oxidation aldehyde fuchins stained particles 528
Oxidation of polycyclic hydrocarbons, dehydrogenases 412
Oxidative enzyme heterogeneity 657
Oxidative enzymes and mitochondria 650
Paneth granules: SH and SS 106
Peptidase activity, $\beta$-naphthylamide substrates 257
Peptidase quantitation, aminonucleoside nephrosis 259
Periodic acid Schiff spectrophotometry 663
Peroxidase, erythrocytes and ascites tumor cells 656
Peroxidase, horseradish in phagosomes 672
Phagosomes demonstrated by horseradish peroxidase 672
pH effect on acid mucopolysaccharide reactions 684
Phosphatase quantitation, aminonucleoside nephrosis 259
Phosphatase ultrastructure in brain 653
Phosphatases in rabbit pancreas and liver 660
Phosphatases in renal development 668
Phospholipids, new solvent azo dyes 665
Phospholipid synthesis, intestinal alkaline phosphatase 596
Phosphorylases a and b and -kinase 688
Phosphotungstic acid hematoxylin, mechanism 664
Photodecoloration of Feulgen reaction 547
Pinocytosis and acid phosphatase 231
Plasmalogens fixation effects on 375
  in muscle 462
Polycyclic hydrocarbon enzymic oxidation 412, 659
Polyvinyl alcohol imbedding 341
Precipitation with basic mucopolysaccharides 24

Protein fractions by oxyphilia and interferometry 680
Protein histochemical reaction with dinitrofluorobenzene 537
Protein metabolism, protozoan macronucleus 145
Protein in sections, microspectrophotometry and radioautography 679
Proteolytic enzyme effect on elastica 222
Pyelonephritis, experimental, histochemistry 686
Quantitative cytochemistry, errors in 96
Quantitative cytochemical models, 2 wavelength method 473
Radioautographs, controlled oxidation of background 678
Radioautography
  cation uptake *in vitro* 664
  coating technic 269
  noradrenaline in brain 392
  of section protein 679
  two emulsion 628
Renal acid phosphatases 671
Renal development in rat: phosphatases 668
Renal phagosomes with horseradish peroxidase 672
Ribonuclease
  action on living and fixed cells 681
  demonstration in tissue 687
  digestion in histochemistry 681, 682
  digestion technic 204
Ribonucleic acid
  by Gram stain 36
  metabolism in nuclei 154
Scurvy, dehydrogenases in seminal vesicle 387
Section freeze substitution, enzyme assay after 592
Section freeze substitution method 650
Secretory granules ultrastructures 654
Seminal vesicle dehydrogenases in scurvy 387
SH distribution in yeast cells 568
Silver, bromine reaction for olefines 83
Skin disease, connective tissue histochemistry 710
Skin, man, cysteine desulfurase 400
Specific DPN dehydrogenases 657
Spectrophotometry, periodic acid Schiff 663
Sperm, Feulgen fading 39
Spinal ganglion cells, enzyme cycle 42
Spreading factor in cholinesterase localization 435
Starch gel electrophoresis of esterases 676
Succinic anhydride, tissue carboxylating reagent 469
Succinic dehydrogenase
  in mouse leucocytes 402
  nucleolar 6
  tetranitro blue tetrazolium 506, 656
  tissue culture mitochondria 504
Sucrose-gum acacia, $\beta$-glucuronidase technic 107
Sudanophilia after acetone freeze substitution 257
Sulfatases, aryl, A, B and C 106
Symposium: *Synthetic Processes in Cell Nucleus* 137–185
Testicular esterases of rat 186
Tetranitro blue tetrazolium for succinic dehydrogenase 506, 656
Tetrazolium salts, chemical anomaly 689
Thiamine diphosphatase histochemistry 580
Thiamine pyrophosphatase and Golgi 651
Thiobutyric acid as histochemical substrate 685
Thymidine $H^3$: 2 forms of X chromosomes 665
Trypsin-like esterases 672
Tissue culture desiccation effect on cytology and cytochemistry 495
Tissue culture mitochondria, succinic dehydrogenase 504
Trypsin-like enzyme in mast cells 109
Two wavelength method for quantitating cytochemical models 473
Ultrastructure
  adenosine triphosphatase 661
  aldehyde fixation 652
  glucose-6-phosphatase 754
  lysosomes, secretory granules 654
Vacuum desiccation effect on cytology and cytochemistry 495
Vaginal periodate Schiff in ontogenesis 29
Versene decalcification of bone, $Ca^{++}$ and N extraction 560
Versene decalcification and dehydrogenases 232
Versene decalcification, fixation and glycogen 245
X-chromosomes, 2 forms by thymidine $H^3$ 665
Yeast cells, SH distribution 568
Zymograms of human esterases 676
  of human brain esterases 676
Zymogram technic in genotype study 103
